- 3. Major accomplishments achieved during FY 1972 with Support Directorate wide implications include:
 - a. During FY 1972 negotiations that had been proceeding for about two years among the National Park Service, the Federal Highway Administration, the Central Intelligence Agency and the General Services Administration culminated in the transfer to CIA of 43.776 acres of land from the Bureau of Public Roads. Subsequent to the acquisition, the additional parcel was enclosed by a chain link fence and an unused water tower was dismantled and removed.
 - b. During FY 1972, a plan of action was undertaken by the DD/S to make use of his Office Heads, meeting as an Executive Committee, in focusing on Support Directorate wide problems. This accomplished plan has had a substantial impact on management, planning, and programs in the Support Directorate.

- 4. With staff personnel ceilings for the Support Directorate as a whole continuing their downward trend (greater than 10 per cent by FY 1974 over FY 1969) and program dollars harder to come by, in looking ahead we have set these objectives for the Directorate as a whole:
 - Development of means better to measure and evaluate the Directorate's progress toward achieving priority Support objectives.
 - b. Development of means for better allocation of Support Directorate resources.
 - c. Reduced reliance on overseas personnel and facilities.
 - d. Wherever possible, employ automation and improved technology as a means of improving productivity which, in turn, should enable the absorption of increased workloads without commensurate personnel increases.
